# Arborjet Solutions

**Our mission** is to develop the most effective formulations and delivery systems possible to preserve the natural and urban forest in an environmentally friendly way, thereby forever changing forest management practices and transforming Arborjet into a premiere solutions provider for the tree care professional.
ABOUT ARBORJET

OUR HISTORY - Arborjet was developed by arborists for arborists in order to effectively manage and control the many exotic and native insect pests and diseases threatening our natural and urban forest today. Founded in 2000 by Peter M. Wild, owner of Boston Tree Preservation in Woburn, MA, Arborjet was established out of Peter’s intent of finding a way to control the invasive Hemlock Woolly Adelgid for his customer base of 20,000. Arborjet’s first prototype was a modification of the needleless medical injection device used post World War II for mass inoculation; Peter and his team were convinced that injection’s time had come and set out to update and rewrite the standard for the future of all trunk injection.

OUR GOALS - Are to provide solutions for treecare professionals which expand their ability to profitably and effectively save urban and natural forests. Arborjet’s products and methodology will always be environmentally conscious and will allow for treatment near waterways and highly populated areas without contaminating the air or the soil. They will be less risky to use by the applicator and our solutions will promote overall plant health care while providing remedies for the world’s most invasive insect pests and diseases.

OUR RESEARCH - Our unique method of developing formulations includes a pairing process which matches the active ingredient with the physiology of the tree. This approach is why you will find significantly longer residual control and superior overall performance with our products. Our ability to achieve such high levels of performance while maximizing uptake efficiency and protecting against phytotoxicity and other harmful side effects sets Arborjet apart.

OUR TEAM - Personal and customized attention is a large part of who we are. We are happy to answer your questions and help you decide which device and products are right for your arborcultural needs. We care about trees and we care about you and your success. Many of our staff are certified arborists and we have a combined total of nearly 250 years in the green industry. Your successful plant health care program helps us realize our mission. Training seminars are held throughout the year. Arborjet devices and products are available through distributors worldwide.

Call us at 781.935.9070 or visit us at www.arborjet.com. Thank you for your interest. You’ll be glad you became an Arborjet-setter!
TREE-äge®

(040-4100) 1 liter*
(040-4105) 1 liter/Case of 8
(4% Emamectin Benzoate)

TREE-äge® insecticide is delivered into the tree’s vascular tissue to assure rapid distribution and consistent results. It has been proven in independent studies to be very effective against Emerald Ash Borer.

*One liter treats 33 trees (10” DBH)

IMA-jet

(040-2003) 1 liter*
(040-2004) 1 liter case of 8
(040-20020) 1 liter (Canada)
(040-20025) 1 liter case of 8 (Canada)
(5% Imidacloprid)

Micro-injectable systemic insecticide for the management of specific insect pests of forests, trees, landscape ornamentals and interior plantscapes.

Effective for: Adelgids (including Hemlock Woolly Adelgid), Aphids, Leaf Beetles (including Elm and Willow Leaf Beetles), Borers (including Emerald Ash Borer, Asian Longhorned Beetle and Bronze Birch Borer), Lacebugs, Leafhoppers, Leafminers, Mealybugs, Psyllids, Scale Insects and Whiteflies.

*One liter treats 25 trees (10” DBH)

Emerald Ash Borer Control

IMA-jet is highly effective against Emerald Ash Borer showing excellent results in studies conducted by Michigan State University.

Reference: www.emeraldashborer.info
Troy, Michigan, EAB Results, D.R. Smitley et. al., Michigan State University

Hemlock Woolly Adelgid Control

IMA-jet is highly effective for multiple years against Hemlock Woolly Adelgid. Research shows over 90% control for up to 3 years with a single IMA-jet treatment.

*Visit arborjet.com for Canada-specific information.
The IMA-jet formulation you’ve come to trust, now available in a 10% formulation. Inject half the formulation, saving time and labor costs.

* 1 liter treats 25 trees (10” DBH)

The only azadirachtin product that’s a water soluble powder.

A non-oil based water soluble powder bio-insecticide, from the botanical plant Neem, for the management of a wide spectrum of insect pests of trees, shrubs, turf, lawn, garden, vegetables, fruit trees, and a variety of crops. Can be used as a spray, soil drench, tree injection or through chemigation.

**Effective for:** Whiteflies, Leafminers, Scale, Mealybugs, Thrips, Aphids, Psyllids, Bugs, Flies, Sawflies, Caterpillars, Beetles, Weevils, Borers, Mole Crickets, Mushrooms Flies and Pests of Turf Grass.

* 6 oz. treats approximately 1 to 3 acres as an agricultural spray (mixes with 50-150 gallons of water) and approximately 43 trees (10” DBH) as a trunk injection.

** 2015 availability TBD

Results of a field experiment showed that AzaSol sprayed at 1.75 tsp and 3.5 tsp/gallon were superior in reducing the shoot and fruit borer incidence and enhancing the fruit yield.
Fungicide Systemic fungicide and plant health response elicitor for the suppression of various plant diseases – for use in spring or fall.

Effective for: Sudden Oak Death, Anthracnose, Phytophthora, Black Spot, Scab, Fire Blight in Apple, Root Rot in Avocado and Citrus, Canker Blight and many others.

*1 liter treats 20 trees (10” DBH)

MINJET™ IRON W/ MANGANESE

(030-4010) 1 gallon*
(0.75% Fe, 0.38% Mn, 0.2% Zn, 0.10% Cu, 0.10% B)

Works for iron chlorosis caused by iron deficiency.
A good choice as a general tree nutrition. Trunk injecting minerals makes them immediately available for use by the tree to enhance health, growth, and development.

Recommended for: Oaks, Birch, Beech, Cherry, Elm, Horse Chestnut, Linden, Poplar, Sycamore and others.

*1 gallon treats 37 trees (10” DBH)

PalmJet™ 1-0-3

(030-4030) 1 gallon*
(1.0% N, 3.0% K, 1.5% Sulfur, 0.2% B, 2.1% Fe, 2.2% Mn, 0.2% Zn)

Specifically formulated for palm; for Manganese deficiency. PALM-jet supplies balanced micro-elements, particularly Manganese for immediate use where Manganese deficiency (Frizzle top) is predominant.

Recommended for: Palms and hardwoods

*1 gallon treats 75 trees (medium size palms) (10” DBH)

PalmJet™ Mg 1-2-2

(030-4130) 1 liter*
(0.75% Fe, 0.38% Mn, 0.2% Zn)

Also works on hardwoods!

(030-4135) 1 liter case of 4*
(1.0% N, 2.0% P, 2% K, 1% Fe, 2.2% Mn, 0.75% Mg, 0.4% Zn, 0.07% B)

We’ve added more manganese to our PALM-jet formulation to combat new nutrient deficiencies in Palms! Not only is PALM-jet Mg great for palm trees, it offers a great nutrient package for hardwoods, too!

Recommended for: Palms and hardwoods

*1 liter treats approximately 66 medium size palms or 25 hardwoods

CLEANJET™

(030-2030) 1 liter
(030-2034) 1 liter case of 12
(0.5% Alkylary Polyalkoxylated Alcohol – Trace Fragrance)

All purpose cleaner and lubricant for all Arborjet injection devices; extends the life of the internal device o-rings.

ROOTJET™ IRON 2-4-4

(040-9000) 2.5 gallons*
(2% N, 4% P, 4% K, 2% Fe, 1% Mn)

ROOT-jet Iron is formulated to supply essential minerals for root growth and leaf greening. ROOT-jet Iron helps to promote root growth and is recommended for trees in high pH soils that have chronic symptoms of Chlorosis (leaf yellowing). ROOT-jet Iron helps to acidify calcareous soils.

*1 liter treats approximately 66 medium size palms or 25 hardwoods

To find a distributor near you visit arborjet.com. For customer service call 1.781.935.9070 or visit us online.

Prices are subject to change. Contact Arborjet directly to get the most current pricing.
**Arbor-O TC™**

(040-7500) 1 oz. (28 g.) container*
(040-7505) 5 oz. (140 g.) container
(36.7% Oxytetracycline)

**Effective for:** Ash Yellows, Bacterial Leaf Scorch, Fire Blight, Leaf Spot, Lethal Yellows, Phytoplasma Disease, Texas Phoenix Palm Decline

*1 oz. (28 g.) container treats 10 trees (10” DBH)

---

**NutriRoot™**

(030-4100) 8 oz. container*
(030-4110) 8 oz. case of 12
(030-4101) 1 quart container
(030-4111) 1 quart case of 8
(030-4102) 32 oz. hose end sprayer
(030-4112) 32 oz. hose end sprayer case of 8
(030-4103) 1 gallon container
(030-4113) 1 gallon case of 2

NutriRoot™ is a unique blend of essential minerals, seaweed extract, humic acid, surfactants, and humectants designed to increase root development and to reduce water stress in trees, shrubs and lawns.

**Recommended for:** Root development, transplant success, water stress management, nutritional deficiencies, sandy soils, dry soil conditions, summer & winter stress.

*8 oz. treats 5 trees at transplant

---

**Eco-Mite Plus™**

(040-7000) 32 oz. RTU
(040-7002) 8 oz. concentrate
(040-7005) 1 quart concentrate*
(040-7020) 1 gallon
(Rosemary, Peppermint, and Cottonseed Oil)

Eco-Mite Plus™ is a contact miticide and insecticide, derived from botanical plant oils and extracts.

**Recommended for:** Eco-Mite Plus controls phytophagous mites, eggs and nymphs and other piercing sucking insects, including aphids, mealybugs, scale crawlers, thrips, and whiteflies.

*1 quart of concentrate treats up to 5,000 square feet

---

**Eco-PM™**

(040-8000) 32 oz. RTU
(040-8002) 8 oz. concentrate
(040-8005) 1 quart concentrate*
(040-8020) 1 gallon
(Thyme and Clove Oil)

Eco-PM™ is a broad spectrum, contact fungicide, derived from botanical plant oils and extracts.

**Recommended for:** Eco-PM controls diseases such as botrytis gray mold, powdery mildews, and phytophthora late blight on common garden and vegetable plants and vines. It controls black spot on roses and anthracnose, rust, and powdery mildews on garden ornamentals.

*1 quart of concentrate treats up to 6,000 square feet

---

QUIK-jet™ Kit
(070-2250)
The QU1K-jet is a cost effective injection tool designed for lower dose applications. It can also be used as a diagnostic tool to assess tree health and vascular activity. The QU1K-kit is a good starter kit for someone just getting into trunk injection and a great complementary tool to the TREE i.V.

KIT INCLUDES
- 1 QU1K-jet device
- 1 Liter supply bottle
- 1 Protective storage bag for QU1K-jet device
- 1 Belt hook
- 1 Belt clip
- 1 Arborplug setter
- 1 3/8” drill bit
- 1 9/32” drill bit
- 1 Needle clean out tool
- 1 Pair of safety glasses
- 1 Graduated cylinder
- 1 Storage bucket
- 1 Funnel
- ½ Liter of CLEAN-jet
- 1 Training manual & 1 Training DVD

QUIK-jet™ Pro Kit
(070-2260)
The QU1K-jet Pro Kit was designed for the tree care professional. Using the same fast and effective QU1K-jet injector device, it also includes a utility belt for ready access to tools, a professional “Doctor’s” style carry bag, and all the ancillary tools and accessories for production injection.

KIT INCLUDES
- 1 QU1K-jet device
- 1 Doctor’s style carrying and storage bag
- 2 1-Liter supply bottles
- 1 Protective storage bag
- 1 Utility belt
- 1 Golf towel
- 1 Spare injector needle
- 1 Belt hook
- 1 Belt clip
- 1 Arborplug setter
- 1 3/8” drill bit
- 1 9/32” drill bit
- 1 Needle clean out tool
- 1 Pair of safety glasses
- 1 Graduated cylinder
- 1 Funnel
- 1/2 Liter of CLEAN-jet
- 1 Training Manual & 1 Training DVD

QUIK-jet™ AIR™ Kit
(070-2350)
Arborjet’s new QU1K-jet Air™ is the latest weapon in the war against tree insects and diseases. Its innovative design combines the simplicity of the popular QU1K-jet™ and power of the VIPER Air Hydraulic systems to create a lightweight, easy-to-use injection tool that maximizes productivity and reduces labor time.

The QU1K-jet Air features one-thumb switch operation, precise dose measuring, and air-powered injection in a rugged aluminum body weighing less than 2 pounds. You’ll notice the difference when you make the switch and use QU1K-jet Air.

KIT INCLUDES
- 1 QU1K-jet device
- 1 Liter supply bottle
- 1 Protective storage bag for QU1K-jet device
- 1 Belt hook
- 1 Belt clip
- 1 Arborplug setter
- 1 3/8” drill bit
- 1 9/32” drill bit
- 1 Needle clean out tool
- 1 Pair of safety glasses
- 1 Graduated cylinder
- 1 Storage bucket
- 1 Funnel
- ½ Liter of CLEAN-jet
- 1 Training manual & 1 Training DVD

TREE I.V. 2-PACK KIT

(070-0010)
Our most versatile injection system. For coniferous and hardwood trees. High volume, low pressure, can be used with mixable products. A perfect starter kit.

KIT INCLUDES
• 1 Bucket
• 2 TREE I.V. bottles
• 8 VIPER valve assemblies
• 2 TREE I.V. manifold 4-line
• 2 TREE I.V. stands
• 2 VIPER needle clean-out tools
• 1 Pressure pump
• 1 TREE I.V. tool kit
• 1 3/8” drill bit
• 1 9/32” drill bit
• 1 Arborplug setter
• 1 Graduated cylinder
• ½ Liter of CLEAN-jet
• 1 Funnel
• 1 Training manual & 1 Training DVD

TREE I.V. PRO KIT

(070-0036)
Designed for high dosage applications in all tree sizes and types. All the components you need for high production, including an extra TREE I.V. and Arborjet bucket instead of a carrying case.

KIT INCLUDES
• 1 Bucket
• 4 Single TREE I.V.
• 16 VIPER valve assemblies
• 4 TREE I.V. manifold 4-line
• 1 TREE I.V. expansion manifold
• 4 TREE I.V. stands
• 2 VIPER needle clean-out tools
• 1 Pressure pump
• 1 QUIK-jet device w/ bottle top assembly
• 1 12 pack bungee cord 12-22”
• 1 3/8” drill bit
• 1 9/32” drill bit
• 1 Arborplug setter
• 1 Graduated cylinder & 1 Funnel
• ½ Liter of CLEAN-jet
• 1 Training manual & 1 Training DVD

DELUXE KIT

(070-0035)
For high and low dosage applications in all tree sizes and all tree types. Everything you need for high production use in one box!

KIT INCLUDES
• 1 Deluxe carrying case
• 3 TREE I.V. bottles
• 1 QUIK-jet injection device
• 1 QUIK-jet liter supply bottle & line
• 12 Deluxe VIPER valve & needle assemblies
• 3 TREE I.V. 4-line manifolds
• 3 TREE I.V. stands
• 2 Needle clean out tools
• 1 Arborplug setter
• 1 Tool kit
• 1 3/8” drill bit
• 1 9/32” drill bit
• 1 Graduated cylinder
• ½ Liter of CLEAN-jet
• 1 Funnel
• 1 Pressure pump
• 1 TREE I.V. expansion manifold
• 1 QUIK-jet training manual
• 1 TREE I.V. training manual
• 1 Training DVD

EXPANSION OPTION

SINGLE TREE I.V. UNIT

(070-0020)
To improve treatment efficiency, add additional TREE I.V. unit(s).

SATISFACTION

“Not only are Arborjet’s products excellent and easy to use, the staff and training opportunities are equally excellent.”

~ Chris Link
City of Richfield Public Works
Richfield, MN
VI
er HYDRAULIC KIT

(010-1001)

For high production programs, government contracts, and agriculture.
Recommended For: Deciduous & ornamental trees.

KIT INCLUDES

- VIPER Air/Hydraulic Device
- Hard carrying case w/strap
- Canvas carrying bag for field use
- 5000 psi Air Tank
- Tools and more

Device listed on chart in order of preference based on speed, ease of application and equipment cost.

- V

PALM INJECTOR KIT

(070-0161)

Designed specifically for palms, this kit can be added to your TREE I.V. or QUIK-jet device to give maximum flexibility when treating palm trees. The Palm Injector Kit offers two needle choices and the ability to inject directly or remotely with or without Arborplug.

Recommended For: Palm trees. Only one injection site is needed to apply the formulations to each palm.

KIT INCLUDES

- Drill Bit 3/16 x 8" Palm Drill
- PTC 1/4" to 5/32" Reducers
- 5/32" Tubing
- STINGER - Palm Needle 8"
- VIPER Needle and line
- Palm Injector bag

Use the Palm Injector Kit with either the QUIK-jet or the TREE I.V.

QUIK-jet connected to the Palm Injector Kit
TREE I.V. connected to the Palm Injector Kit

EFFECTIVE

Arborjet makes caring for your palms quick and effective with the Palm Injector Kit!

For use with Arborjet’s QUIK-jet or TREE I.V.
The Arborjet Methodology represents the cutting edge in trunk injection technology. It is precise, efficient, highly effective and easy to do.

The Arborjet drill, plug, inject method is quick, easy to learn and you can start treating trees immediately.

How Long Does it Take?
At the TCI EXPO and ISA Shows, we host the Arborplug QUICK SET Challenge. Our top customers drill, plug, and inject in less than 11 seconds!

- Fastest product delivery times
- No risk of cambial injection
- Closed injection site
- Lowest wound profile
- Fastest wound closure
- No risk of bark separation
- No product “blow-back”
- No bark cracking

#4 Arborplug 3/8”
(070-0155) Pack of 100
Recommended for: Conifer and medium to large trees.

#3 Arborplug 9/32”
(070-0150) Pack of 100
Recommended for: Small to medium deciduous trees.

Advantages of the Arborplug
- Tight seal for fast, consistent injection.
- Protects the surrounding environment and the applicator from unintended product contact.
- Minimizes the number of injection sites and helps to inhibit infection.

Proper Arborplug Placement

SET CORRECTLY
- Fastest rate of uptake
- Least chance of leakage
- Best protection of the cambium
- Fastest wound closure (growth over the Arborplug)

GUARANTEED

“The Arborjet system is far superior to all other injection systems I’ve used in 15 years of injecting trees.”

~ Jeremy Sayers
Tree Doctor Consulting
Buffalo, NY

Correct

SET TOO SHALLOWLY
- Highest chance of leakage
- Higher chance of bark splitting
- Least protection of the cambium
- Slower wound closure
(pushes the Arborplug out)

SET TOO DEEPLY
- Slowest rate of uptake
- Higher chance of leakage
- Deeper wound than necessary

Arborplug Technology
**TREE I.V. REPLACEMENT PARTS**

- **VIPER Valve Assembly**

Arborjet has a variety of high quality training and marketing resources available to train personnel and grow your Arborjet Plant Health Care business. Materials are available for purchase through Arborjet or as a free download from our website.

Training DVD
(QUIK-jet & TREE I.V.)
(020-1001)

Arborjet Pocket Guide
(020-1051)
A 36 page pocket sized, illustrated guide to the most common trees & pests, and how to treat with Arborjet products. It’s an extremely useful tool when out in the field.

Tree Pest Program Planners
Southeastern (020-4004)  Western (020-4006)
Midwestern (020-4005)  Northeastern (020-4007)
An 8½” x 11” pad of 50 tear-off sheets designed to assist applicators applying Arborjet’s wide range of products to a specific region’s most common pests.
Free download on website.

Arborjet Pest Reference Booklet
(020-1050)
8 ½ by 11” booklet outlining tree insects & treatment, tree diseases & treatment, nutritional supplements, and trees & uptake characteristics.
Free download on website.

Custom Trunk Injection Handout
(020-4015)
A 2 sided 8½” x 11” custom color sales sheet outlining the advantages of injecting using the Arborjet method to homeowners. It explains how it works and what it does. Space on back for attaching your business card or adding text.
Free download on website.

Spiraling Whitefly Handout
(020-4017)
A 50 pack of 8.5” x 11” glossy handouts printed both sides with information about spiraling whitefly and available Arborjet treatments. Includes space on back to attach business card or sticker with company information.
Free download on website.

Custom Emerald Ash Borer Handout
(020-4019)
Full-color customizable 8.5x11” handout outlining the benefits of trunk injection treatments for EAB. Free download on website.

EAB Municipality Brochure
(020-4001)
A multi-page 6” x 8” color brochure with current information about emerald ash borer, treatment options, university study data, and cost comparisons useful for municipal agents or agencies caring for municipal trees.

Treatment Facts for EAB
(020-4000)
A 4 page, 8½” x 11” color brochure outlining current Emerald Ash Borer facts, Arborjet treatments and university study data supporting effectiveness of Arborjet products.
Free download on website.

EAB Doorhanger
(020-4002)
4.25” x 11” Full color, double sided doorhanger for promotion of EAB treatment with space for attaching your logo or business card.

Trunk Injection Doorhanger
(020-4018)
Educate customers and prospects about why your company uses Arborjet Trunk Injection and what it means for their trees. Adequate space for attaching business cards.

Pine Beetle Doorhanger
(020-3998)
4.25” x 11” Full color, double sided doorhanger for promotion of Pine Beetle treatment with space for attaching your logo or business card.

Whitefly Doorhanger
(020-4016)
Check whitefly marketing off your ‘honeydew’ list and order these doorhangers today. Tell your customers that you’re a leader in Rugose Spiraling Whitefly treatments. Sold in 50 packs.
Arborjet has developed an offering to help you produce a customized video to share with your customers. The video features your logo, pests you treat, and your contact information to be contacted by your customers. It’s free – you pay $150 up front and we’ll reimburse you 3 packs of Arborplugs®.

Here’s how it works:
1. Visit arborjet.com/customvideoprogram
2. Decide which video you’d like: General (see above) or Florida-specific (see to the right)
3. Fill in the online form
4. Share the video with your customers, on the web, Facebook, etc.
5. Notify Arborjet that you’ve shared the video
5. Receive 3 packs of Arborplugs!

Questions? Call us at 781-935-9070 or email us at ajinformation@arborjet.com for clarification.

What Do I Need?
Arborjet’s revolutionary plant health solutions have been designed to meet your most challenging tree care needs. Whether you’re a professional arborist, landscaper, pest control applicator, grounds manager, or municipal leader, Arborjet has the right solution for you.

Professional Arborists
Arborjet provides a variety of tools and formulations which give the arborist complete control for a broad range of insect and disease pests, allowing him/her to tailor the treatment protocol on each client’s property.

Landscapers & Pest Control Applicators
Invasive insects and diseases have created ample opportunities for expanding landscaping and pest control businesses to include tree health care. Species-specific pests are straightforward to identify, and high regional pest pressures create high demand for treatments.

Grounds Managers
Managing the grounds of golf courses, resorts, ski areas, and the like is difficult enough without having to worry about planning treatments around guest activities. With Arborjet tree injection, grounds managers are able to treat their trees discreetly.

Municipal Leaders
The urban forest has a value far beyond the aesthetic qualities in parks and along roadways. Municipal treatment programs are often much less expensive in the long run than clear-cutting strategies and the city retains its beautiful mature canopy.

Retail Distributors

To locate a distributor or service provider near you, go to the “Contact Us” tab on our website: www.arborjet.com.

Arborjet is committed to providing the personal service you deserve. We stand behind all of our products and want to make sure you are completely satisfied.

WARRANTY: Arborjet equipment is warranted for 90 days against defects in workmanship and materials. RETURNS: 1. Locate original invoice and contact Arborjet. 2. Upon authorization, package item appropriately, including a copy of the original invoice, and ship prepaid to: Arborjet Inc, Merchandise Return, 99 Blueberry Hill Rd, Woburn, MA 01801. (Conditions: all returns must be authorized by Arborjet and must be accompanied by original invoice. Unless otherwise warranted, all returns must be made within 30 days of purchase. A 20% restocking fee will be applied to returns of non-defective goods. All sales of liquid products are final. Credit or refund will be applied when returned merchandise is received by Arborjet. Returns which are deemed to be in good working order or returns for goods damaged and not defective shall be returned to customer if customer prepays the freight. These goods will be held for 30 days after notification and then destroyed without liability of replacement or refund by Arborjet).
