AzaSol™ Non-Oil Based Water Soluble Powder
(6% Azadirachtin)
AzaSol is a broad spectrum insecticide botanically derived from Neem.

Effective for: Aphids, Whiteflies, Leafminers, Caterpillars, Scale, Mealybugs, Thrips, Psyllids, Bugs, Flies, Fungus Gnats, Sawflies, Beetles, Weevils, Borers, Mole Crickets, and more.

- 040-5020 0.25 oz. Container: Makes up to 6 gallons
- 040-5011 0.75 oz. Packet: Makes up to 18 gallons
- 040-5001 6 oz (8 of 0.75 oz. Packets): Makes up to 108 gallons

What is Neem?
Neem is a tree native to India, *Azadirachta indica*. The seeds contain the active ingredient Azadirachtin, which is a proven natural anti-feedant, growth regulator, anti-ovipositor, and insect repellent. Neem offers an effective botanical solution to controlling insects that attack fruit trees, coconut palms, and trees located in sensitive areas like gardens, resorts, and schools.

The AzaSol Difference
AzaSol is a water soluble powder which comes from the highest quality Neem. Through its patented production process, AzaSol provides an exceptionally potent, non-oil based, and environmentally friendly insect control solution.

- 6% Azadirachtin offers highest active ingredient
- Highly water soluble for fast systemic activity
- Injects into trees quickly for rapid uptake and protection
- Zero days to harvest - may be injected up until the day fruit or nuts are harvested for consumption
- Applies to plants clear when sprayed, no oily residue
- OMRI Listed for organic use
AzaSol’s Patented Process

1. Neem seeds are picked from the best growing regions in India.
2. The Neem seed center is physically removed by machine.
3. The Azadirachtin is isolated and concentrated.
4. The Azadirachtin is microencapsulated to make it water soluble.
5. AzaSol’s unique water soluble powder with a 6% concentration is the result.

Clarification of Trunk Injection Use Rates*

*The attached information is taken from the AzaSol label, but is not meant to be a supplement, nor does it replace the label. You must read the entire AzaSol label.

Application Equipment:
AzaSol may be used with the Arborjet Tree Injection Systems or with other tree injection devices that meet the label requirements. For all injection systems, carefully read and follow the manufacturer’s direction for use.

TREE INJECTIONS:
1. Inject 4 mls of solution every 6” (15 cm) of stem circumference in trees <8” DBH (20cm).
2. Inject 6 mls of solution every 6” (15 cm) of stem circumference in trees 8-16” DBH (15-40cm).
3. Inject 8 mls of solution every 6” (15 cm) of stem circumference in trees >16” DBH (>40cm).

PALM INJECTIONS:
In palms, only one injection site is generally required.
1. Locate the application site 1-3’ (30-90 cm) from the soil level.
2. Drill depth is 1/3 the total diameter or 4” (10 cm) deep into the stem (whichever is less).
3. Refer to table: Use Rate Recommendations for Palm Injection for dosages to apply.
