ARBORJET FOR RESORTS & HOTELS

The Arborjet Advantage

Tree injection is an effective alternative to spraying or soil applying pesticides for tree pest control. Arborjet equipment injects formulations directly inside the tree's vascular system. With over 15 years of research and development, our equipment and formulations are proven to provide effective results.

What Pests Can I Treat?

Arborjet equipment can inject any tree type including conifers, deciduous, and palms. Arborjet formulations can treat for hundreds of different pests including: borers, caterpillars, bark beetles, scale insects, and more.

How Valuable Are Your Trees?

You know trees are important, but just how valuable are they? Your trees are valued by individuals for the protection they provide from the sun, rain, wind, sound, and for the aesthetic beauty.

Calculate the benefit of your tree at www.treebenefits.com/calculator

How Do I Buy Arborjet?

Arborjet has distributors near you, or you can also hire a qualified Arborjet service provider. You can find Arborjet providers on our website by zip code search.

99 Blueberry Hill Road • Woburn, MA 01801
