

# BOTANICAL CONTROL DISPLAY

Item # 040-8300

## A Better Way to Grow

**Eco-PM® and Eco-Mite Plus®** are specialty blends of high quality, organically sourced, botanical oils and extracts providing higher concentrations and more effective disease and insect control. Many of the oils and extracts are distilled in house to assure quality and consistency.

- EPA Minimum Risk active ingredients allowed for use on food crops
- Specifically designed to avoid burning

**AzaSol™** is a completely water soluble powdered Neem product. 6% Azadirachtin, it was developed for superior biologically based insect control. Through its patented production process, AzaSol provides a highly potent, non-oil based, and environmentally friendly insect control solution.

- Won't burn leaves or block photosynthesis
- OMRI Listed for organic use on food crops

## A Better Way to Profit!

Offer your customers a one stop shop to a naturally protected garden with the Botanical Control Display. Shoppable and stocked with a variety of sizes, this display meets the growing needs of any home gardener.

- More Profit – FREE Corrugated Display
- Space Saving – 13.5"W x 16.25"D x 60"H
- Easy Set Up - Comes Pre-Stocked

# FERTILIZER & WATER MANAGER DISPLAY

Item # 030-5210

## A Better Way to Grow

**NutriRoot™** is a unique blend of a water manager, nutrients, kelp and humates in one, providing a single solution for managing drought stress, reducing watering, and accelerating root growth.

**ARBORChar™** is a soil amendment and complete fertilizer amended with Biochar derived from recycled trees providing a balance of naturally derived nutrients and minerals to help improve leaf vigor, root development, and soil structure.

### Soil Structure

*Feeds microbes & reduces compaction, aiding in root development.*

### Plant Nutrition

*Provides a complete fertilizer for ornamental and edible plants.*

### Environmental Benefits

*Improves water retention and reduces nutrient leaching.*

## A Better Way to Profit!

Offer your customers a one stop shop to a more bountiful garden with the Fertilizer & Water Manager Display. Shoppable and stocked with a variety of sizes, this display meets the growing needs of any home gardener.

- More Profit – FREE Corrugated Display
- Space Saving – 13.5"W x 16.25"D x 60"H
- Easy Set Up - Comes Pre-Stocked

| 030-4102 | NutriRoot 32 fl. oz. Hose End Sprayer | 3                |
| 030-5110 | ARBORChar All Purpose Grow 1 lb.      | 5                |
| 030-5120 | ARBORChar Root, Flower & Fruit 1 lb.  | 5                |

# NUTRIROOT DISPLAY

Item # 030-5200

## A Better Way to Grow

**NutriRoot™** is a unique blend of a water manager, nutrients, kelp and humates in one, providing a single solution for managing drought stress, reducing watering, and accelerating root growth.

### The NutriRoot Difference

Unlike most products currently available on the market that are purely nutrient-based or simply a standalone water management product, NutriRoot combines these into one easy and effective treatment enabling soil to extract water from the air into the root zone, reducing the need for watering and resulting in successful plantings even in stressed conditions.

- Patented blend of humectants draws water from the air
- Reduces water run-off from repellent, dry soil surfaces
- Includes Humic acid, Kelp & Micro-nutrients to support soil micro-biology

## A Better Way to Profit!

Help your customers increase transplant success and water less with the NutriRoot Display. Shoppable and stocked with a variety of sizes, this display meets the needs of any gardener.
