

TREE PEST PROGRAM PLANNER

Midwestern USA

USING THIS CHART

Use the chart below to determine what time of year to treat, and which Arborjet product to use.

-  **TREATMENT WINDOW** | BEST
-  **TREATMENT WINDOW** | MODERATE

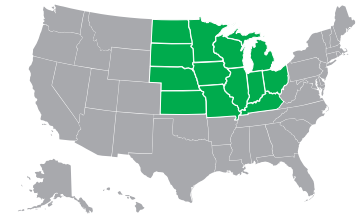

WHAT YOU NEED TO KNOW

- Multiple application choices may be available and the benefits of each are discussed. These treatments may vary in cost, longevity (residual) and control.
- Our insect control, disease control, and micronutrient injections can be followed up routinely with a soil treatment like **NutriRoot™** to help maintain micronutrient balance in the soil.

PEST			JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEPT	OCT	NOV	DEC
	Emerald Ash Borer	Treatment Window												
		Application Choice	TREE-äge® Insecticide offers two years of control and higher efficacy than other leading products as shown in university studies¹. IMA-jet also provides excellent performance at lower per-mL cost than TREE-äge (best applied in spring). AzaSol™ is an OMRI-listed organic solution and can be sprayed or injected for food-bearing plants, trees, and palms.											
	Leaf Chewing Beetles (Elm Leaf, Japanese, et al.)	Treatment Window												
		Application Choice	IMA-jet offers excellent control and can be followed with MIN-jet Iron or PALM-jet Mg to provide a greening nutritional response. ACE-jet offers a quick knockdown product at low cost that lasts about 60 days.											
	Fire Blight	Treatment Window												
		Application Choice	Arbor-OTC® provides control of bacterial diseases in trees. PHOSPHO-jet makes the plant resistant to disease and improves overall health & appearance.											
	Flat-headed Borers (Including Bronze Birch Borer and Two-Lined Chestnut Borer)	Treatment Window												
		Application Choice	TREE-äge offers two years of control and higher efficacy than other leading products as shown in university studies¹. IMA-jet also provides excellent performance at lower per-mL cost than TREE-äge (best applied in spring).											
	Anthracnose	Treatment Window												
		Application Choice	PHOSPHO-jet makes the plant resistant to disease and improves overall health & appearance. Propizol® offers a preventative or therapeutic treatment for sycamores and can be followed by MIN-jet Iron or PALM-jet Mg for a nutritional response.											
	Oak Wilt	Treatment Window												
		Application Choice	Propizol offers a preventative or therapeutic treatment and can be followed by MIN-jet Iron or PALM-jet Mg for a nutritional response. PHOSPHO-jet makes the plant resistant to disease and improves overall health & appearance. It is recommended that you disinfect drill bits between trees.
