

Date: March 21, 2022  
Product: ACE-jet™ EPA Reg. No. 74578-2  
Use: Control of Spotted lanternfly [HEMIPTERA: FULGORIDAE: *Lycorma delicatula* (WHITE)] (SLF) in Trees and Landscape Ornamentals including Deciduous Tree Farms, Seed Orchards and Plantations, and Forest Trees.  
State/District: CT, DE, MA, MD, ME, NH, NJ, OH, PA, RI, VA, VT  
Manufactured for Arborjet, Inc. 99 Blueberry Hill Road, Woburn, MA 01801 SCPL ABJ 1309A-L1C 1210

### DIRECTIONS FOR INJECTION USE

Refer to mixing instructions on the ACE-jet label to prepare the injection solution. Apply 4.5 ml of ACE-jet solution per inch diameter at breast height (DBH). Apply 9 mls of ACE-jet solution per injection site every 6" of stem circumference.

Apply when insects (SLF third instar nymphs) first appear. Repeat applications monthly through October as necessary.

Note: Spotted Lanternfly host trees include Tree of Heaven, Birch, Linden, Black Walnut, Willow, Black Gum, Oak, Maple, Beech, Dogwood, Sassafras, Tulip Poplar, Crabapple, Hickory, White Ash & Sycamore. For best results, apply when there is good soil moisture and when trees do not have preexisting vascular tissue damage. If vascular tissue is damaged or plugged by insect galleries, nematodes or fungi, uniform treatment and control may not be achieved.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

The user must refer to the federally approved labels for the above noted product and read and follow all directions for use, restrictions, and precautions.

The user should have this recommendation in its possession at the time of use.

This recommendation for use of this product is permitted under Section 2(ee) of FIFRA and has not been submitted to or been approved by EPA.
