SOIL INJECTOR **ISD**

EQUIPMENT

SOIL INJECTOR DESIGNED FOR ACCURATE & REPEATABLE DOSING

AccuFlo® Soil Injector ISD

The AccuFlo® Soil Injector is the latest in Arborjet's product application technology; delivering precise and repeatable dosing at twice the pressure, and half the weight of competitor devices. A versatile, portable, and intuitive system for all of your soil injection, drench, and foliar spray application needs.

AccuFlo Soil Injector Kit - 9 gallon Roller Tank - (070-3200)

INCLUDES:

- AccuFlo Soil Injector Device
- Variable Pressure 9 gallon All Terrain Wheeler™ (9gal/ 18V Battery)
- Graduated Cylinder
- Tool Kit
- Pair of Safety Glasses
- Training Manual

Why use the AccuFlo Soil Injector?

The AccuFlo Soil Injector outmatches the competition in accuracy, weight, pressure, flexibility, and more! The dose-size barrel is calibrated in increments of 10mL for precise fluid injection volume, which is essential in preventing over-regulation, and helps to prevent excess product usage.

- Dosing increments ranging from 10mL to 300mL per injection
- Battery powered All Terrain Wheeler™ for a quiet, low-carbon device
- Five Adjustable pressure settings for various soil conditions
- Automatic recirculation provides product agitation
- Lightweight, intuitive, and easy-to-use design
- Operating injection pressure of 100psi
- Use system to apply PGRs, fertilizers, and pesticides
- Extra-long hoses for increased maneuverability
