

GelTrak[®]

Dust Suppressant

Designed for challenging environments, GelTrak[®] reduces water usage for dust control by up to 50% while improving air quality and visibility. Its advanced formula binds fine particles to heavier soil, preventing drift onto sensitive surfaces and delivering lasting performance for up to three months.

Unlike corrosive alternatives, GelTrak[®] is biodegradable, non-toxic, and safe for people, animals, and crops. By reducing the need for constant watering, it also cuts labor, tanker fuel use, and driver hours—helping operations save time, conserve water, and lower costs.

GelTrak[®] keeps dust down and air clean—safely and sustainably.

PRODUCT APPLICATIONS

Music Festivals	Horse Arenas
Sports Fields	Gravel or Dirt Roads
Auto Racetracks	Construction Sites
Infields	Nursery & Flower Farms

SIZES

- 2.5 Gallon — 080-7035
- 5 Gallon — 080-7040
- 30 Gallon — 080-7050
- 275 Gallon - 070-7070

GelTrak®

Roadway Dust Suppressant

APPLICATION INSTRUCTIONS

Grade, rake or harrow compacted soil prior to application. For uniform coverage, it is recommended that surfaces are dampened prior to applying.

TREATED AND UNTREATED

UNTREATED

TREATED WITH GELTRAK

PRODUCT BENEFITS

HYGROSCOPIC

Binds and retains surface moisture for effective dust control

SAFE TO USE

Ensures safety for people, animals, and crops with a biodegradable formula

NON-CORROSIVE

Causes no damage to vehicles, equipment, and infrastructure

LONG-LASTING

Controls dust for up to three months; enhances results with repeat applications

PROTECTS PLANTS

Reduces dust to support plant health, appearance, and food safety

ENHANCED EFFICIENCY

Lowers water use, and overall costs for fuel, equipment and labor
