for Micro-Infusion®

Date: February 7, 2019
Product: IMA-jet 10® EPA Reg. No. 74578-6
Use: One-year Control of Spotted lanternfly (HEMIPTERA: FULGORIDAE:
Lycorma delicatula (WHITE))
State/District: PA, MD, DE, NJ, VA
Manufactured for Arborjet, Inc. 99 Blueberry Hill Road, Woburn, MA 01801 SCPLLABJ 1309A-LIC 1210

DIRECTIONS FOR INJECTION USE

Apply between 2ml and 6ml of IMA-jet 10® per inch diameter at breast height (DBH). For trees less than 12" in diameter, use the lower rate for the targeted pest. If trees are severely infested, use the highest label rate specified for control of the targeted pest. For trees larger than 24" diameter, always use the highest label rate for the targeted pest. For best results, apply when there is good soil moisture and when trees do not have preexisting vascular tissue damage. If vascular tissue is damaged or plugged by insect galleries, nematodes or fungi, uniform treatment and control may not be achieved.

Recommended rates are between 2ml and 6ml and tree species are based on the IMA-jet 10® label.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

The user must refer to the federally approved labels for the above noted product and read and follow all directions for use, restrictions, and precautions.

The user should have this recommendation in its possession at the time of use.

This recommendation for use of this product is permitted under Section 2(ee) of FIFRA and has not been submitted to or been approved by EPA.
