

Systemic Insecticide
for Micro-Infusion®

Date: December 23, 2016
Product: IMA-jet® EPA Reg. No. 74578-1
Use: One-year Control of Spotted lanternfly (HEMIPTERA: FULGORIDAE:
Lycorma delicatula (WHITE))
State/District: PA, MD, DE, NJ, VA
Manufactured for Arborjet, Inc. 99 Blueberry Hill Road, Woburn, MA 01801 SCPPLABJ 1309A-LIC 1210

DIRECTIONS FOR INJECTION USE

Apply between 4ml and 8ml of IMA-jet® per inch diameter at breast height (DBH). For trees less than 12" in diameter, use the lower rate for the targeted pest. If trees are severely infested, use the highest label rate specified for control of the targeted pest. For trees larger than 24" diameter, always use the highest label rate for the targeted pest. For best results, apply when there is good soil moisture and when trees do not have preexisting vascular tissue damage. If vascular tissue is damaged or plugged by insect galleries, nematodes or fungi, uniform treatment and control may not be achieved.

Recommended rates are between 4ml and 8ml and tree species are based on the IMA-jet® label.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

The user must refer to the federally approved labels for the above noted product and read and follow all directions for use, restrictions, and precautions.

The user should have this recommendation in its possession at the time of use.

This recommendation for use of this product is permitted under Section 2(ee) of FIFRA and has not been submitted to or been approved by EPA.
