It is a violation of Federal law to use this product in a manner inconsistent with its labeling. The user must refer to the federally approved labels for the above noted product and read and follow all directions for use, restrictions, and precautions. The user should have this recommendation in its possession at the time of use. This recommendation for use of this product is permitted under Section 2(ee) of FIFRA and has not been submitted to or been approved by EPA.

USE RATE DESCRIPTIONS:

Use ½ oz (14g) AzaSol in 1-4 gallons of water.

USE RECOMMENDATION:

Low Rate (Recommended for preventative treatments before signs of infestation.) ½ oz (14g)/3-4 gal water.

Medium Rate (Recommended for most treatments. For preventative to medium infestations when pests are present.) ½ oz (14g)/2-3 gal water.

High Rate (Recommended for difficult to manage pests or high infestations.) ½ oz (14g)/1-2 gal water.

APPLICATION METHOD AND EQUIPMENT:

Apply AzaSol as a foliar spray or a drench to soil or soil-less media (e.g., greenhouses and mushroom houses) to control insects and nematodes. When needed, drench soil to control soil-borne pests, including soil-borne larvae of foliar insect pests. When applying as a drench, avoid excessive leaching.

Foliar applications should be made to both sides of leaves. In addition, a sticker agent used as per the manufacturer's recommendations may improve product performance.

*Use of this product according to this bulletin has not been reviewed or endorsed by the Office of the Indiana State Chemist.
