

# Mn-jet Fe™

## LIQUID MICRONUTRIENT SOLUTION FOR HARDWOODS, CONIFERS, PALMS, AND GROUNDCOVERS

### Mn-jet Fe

(2% Iron, 2% Manganese, 1% Potassium, 0.5% Zinc, 0.1% Copper, 0.1% Boron)

Mn-jet Fe is a balanced source of micro-elements for alleviating chlorosis caused by Manganese and Iron deficiencies.

**Effective for:** Leaf yellowing or chlorosis caused by Manganese and Iron deficiencies. Also a good choice for general tree nutrition.

- 030-4160 1 Liter\*
- 030-4165 1 Liter Case of 4

*\*1 Liter treats 20 trees (10" DBH) at low rate*

### Why Use Mn-jet Fe?

Mn-jet Fe is a fast and effective solution for symptoms of chlorosis due to Manganese and Iron deficiencies. Its liquid formulation is specifically designed for rapid distribution through the vascular system of trees. Mn-jet Fe's versatility allows it to be injected using micro and macro-infusion equipment, or applied as a foliar spray for shrubs and groundcovers.

Mn-jet Fe increases chlorophyll production for up to three growing seasons; and it improves tree vitality and enhances the natural green color, restoring the aesthetic qualities of shade trees.

- Liquid formulation is easy to mix into solution
- May be applied as formulated or diluted with water
- Can be used with all Arborjet injection and infusion devices
- Rapid green-up in two to four weeks
- Up to three years of green-up using fall rate
- Easy to use summer and fall rates

## Results

Mn-jet Fe significantly reduced the impact of chlorosis in trees with both spring and fall treatments.

Applications of Mn-jet Fe can be made from the time of leaf maturity throughout the growing season using the LOW RATE. Applications at the HIGH RATE dosage can be made just prior to leaf drop or after leaf drop in the fall. Re-apply Mn-jet Fe when chlorotic symptoms reappear.
