

FERTILIZATION &
SOIL ENHANCEMENT

NutriRoot® Granular 3-3-3

Granular multi-purpose fertilizer + soil amendment

NutriRoot® Granular is a blend of essential minerals, seaweed extract, humic acid, surfactants, and humectants designed to improve transplant establishment and increase root development. Reduce environmental stresses in trees, palms, shrubs, landscape, and containerized plants. Easy to apply, handle, and store.

PRODUCT APPLICATIONS

Root Development

Radial Trenching

Transplant Success

Root Collar Excavation

Water Stress Management

Vertimulching

Nutrient Deficiencies

Landscape Plants

Sandy Soils

Containerized Plants

Summer Stress Management

Backfill Additive

Winter Stress Management

Top Dressing

SIZES

5.8 lbs (2.6 kg) — 030-4171

Treats up to thirty 2" caliper trees
or up to 3,500 sq. ft. of gardens.
