

TREE INJECTION

PHOSPHO-jet™

Systemic Injectable Fungicide

PHOSPHO-jet™ is a systemic fungicide that delivers powerful disease suppression while activating a plant's natural defense systems. Ideal for spring or fall applications, it combines proven phosphorous-based chemistry with plant health benefits for enhanced vitality.

Formulated for rapid uptake and efficient translocation, PHOSPHO-jet™ provides broad-spectrum protection against damaging pathogens. Its unique mode of action also strengthens cell walls and promotes vigorous root, stem, and leaf growth—helping trees thrive season after season.

DISEASE APPLICATIONS

Beech Leaf Disease

Sycamore Anthracnose

Fire Blight

Apple Scab

Sudden Oak Death

Phytophthora

Black Spot

Root/Bud Rot

Downy Mildew

Canker Blight

SIZES

1 Liter* — 040-3011

1 Liter Case of 8 — 040-3016

*1 Liter treats 20 trees (10" DBH)

PHOSPHO-jet

INGREDIENTS

45.8% Phosphorous Acid

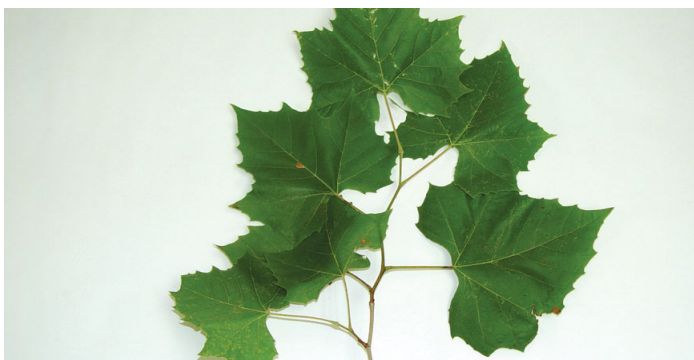

RESULTS

PHOSPHO-jet has shown efficacy in suppressing Beech leaf disease, Phytophthora, black spot, scab, fire blight, anthracnose and more. It's recommended to be proactive and treat with PHOSPHO-jet early in the year, or late in the fall.

SYCAMORE WITH ANTHRACNOSE

SYCAMORE TREATED WITH PHOSPHO-JET

PRODUCT BENEFITS

SYSTEMIC

Moves throughout the tree via trunk or plant injection, soil drench or foliar spray

CONCENTRATED

Contains 45.8% phosphorus acid

NUTRITIONAL

Builds cell walls, improves root, stem and leaf growth

PREVENTATIVE

Controls disease development, strengthens plant defenses

BROAD-SPECTRUM

Protects against a wide variety of fungal infections

VERSATILE

May be applied to multiple plant types, including food crops
