

TREE PEST PROGRAM PLANNER

Southeastern & South Central

USING THIS CHART

Use the chart below to determine what time of year to treat, and which Arborjet product to use.

 **TREATMENT WINDOW** | BEST

 **TREATMENT WINDOW** | MODERATE

WHAT YOU NEED TO KNOW

- Multiple application choices may be available and the benefits of each are discussed. These treatments may vary in cost, longevity (residual), and control.
- Our insect control, disease control, and micronutrient injections can be followed up routinely with a soil treatment like **NutriRoot® 2-2-3** to help maintain micronutrient balance in the soil.

PEST			JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEPT	OCT	NOV	DEC
	Whitefly (Rugose Spiraling Whitefly, et al.)	Treatment Window												
		Application Choice	IMA-jet® provides season long control, reducing honeydew and sooty mold produced by whitefly infestations. ACE-jet™ offers a quick knockdown that lasts about 60 days. AzaSol® is a OMRI - listed botanical and can be sprayed or injected.											
	Mites (Spider, Red Palm, et al.)	Treatment Window												
		Application Choice	TREE-äge® G4 and TREE-äge® R10 provide highly effective control for up to 2 years with a single application. ACE-jet offers a quick knockdown that lasts about 60 days.											
	Scale Insects & Mealybug	Treatment Window												
		Application Choice	IMA-jet provides season long control reducing honeydew and sooty mold produced by insect feeding. AzaSol® is an OMRI-listed botanical that can be sprayed or injected.											
	Micro-Nutrient Deficiency (Chlorosis, Frizzle Top, et al.)	Treatment Window												
		Application Choice	Use PALM-jet Mg™ or Mn-jet Fe™ to alleviate certain micronutrient deficiencies. Use NutriRoot as a soil application to also encourage root growth. The addition of Shortstop® 2SC will promote a greener and healthier tree through secondary effects, such as an increase of fine root development. It is these fine roots that will increase the uptake of iron and manganese available in the soil.											
	Emerald Ash Borer	Treatment Window												
		Application Choice	TREE-äge® G4 and TREE-äge® R10 offer highly effective control for up to 2 years. IMA-jet® provides annual control and is preferred when piercing and sucking pests are also present.											
	Palm Weevil and Borers	Treatment Window												
		Application Choice	IMA-jet provides season long control and can be followed by ACE-jet for quick knockdown and lasts about 60 days.

PEST			JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEPT	OCT	NOV	DEC
	Lethal Bronzing Disease (formerly Texas Phoenix Palm Decline, lethal yellows)	Treatment Window												
		Application Choice	Use IMA-jet for control of the vector pest and Arbor-OTC® for suppression of bacterial phytoplasma diseases.											
	Thrips	Treatment Window												
		Application Choice	IMA-jet provides season long control to reduce incidence of vectored disease and leaf stippling. ACE-jet offers a quick knockdown that lasts about 60 days. AzaSol is an OMRI-listed botanical that can be sprayed or injected.											
	Bark Beetles (Ips, Southern Pine, Ambrosia)	Treatment Window												
		Application Choice	TREE-äge G4 and TREE-äge R10 provide highly effective control for up to 2 years with a single application. Treating with Propizol is recommended for control of insect vectored blustain fungi.											
	Hypoxylon Canker	Treatment Window												
		Application Choice	PHOSPHO-jet™ elicits a plant health response which improves tree wound response to canker development.											
	Hemlock Woolly Adelgid	Treatment Window												
		Application Choice	Use IMA-jet to control infestation and to enhance tree growth response. ACE-jet offers a quick knockdown that lasts about 60 days. AzaSol is an OMRI - listed botanical that can be sprayed or injected.											
	Oak Wilt	Treatment Window												
		Application Choice	Use Propizol® as a preventative treatment prior to infection for best results.
