

TREE INJECTION

INTELI-jet®

Smart, Simple, Efficient

The INTELI-jet is a battery-powered, tree-injection system with an eight-hour charge that allows users to work uninterrupted all day.

Patented smart injection technology works with the tree to enhance uptake speeds, making the technology fast and efficient. Simply set the controls, and the device does the work for you, displaying injection pressure, dose count and milliliters applied on a built-in screen.

The INTELI-jet is compatible with Arborplug® and plugless technologies, and it can also connect directly to our FSeries® Hex Manifold, helping you manage large jobs.

PRODUCT APPLICATIONS

Insect and Disease Control

Micronutrient Injection

Deciduous, Conifer and Palm Injection

Variable Pressure Range

Small and Large Jobs

PARTNERS IN PLANT CARE

INTELI-jet®

BATTERY-POWERED TREE INJECTION

PRODUCT BENEFITS

TWO PULSE MODES

Active and Smart modes work with the tree's pressure to improve performance on difficult injections

BATTERY-POWERED

Full-day functionality with our long-lasting rechargeable battery

SMART INJECTION

Set the pressure, dose and mode, and the on-screen counter will keep track for you

LIGHTWEIGHT

Durable, ergonomic, carbon-fiber body weighs less than 2 pounds and is easy to handle

— INTELI-jet Kit —

KEY KIT CONTENTS*

- 1 INTELI-jet device
- 1 Liter bottle and Supply Line
- 1 Battery Kit
- 1 Carry bag with shoulder strap

*Visit our website for a full list of kit contents

SAVE TIME & LABOR

Efficient applications keep your crews moving

EXPANDED USAGE

Connects to our FSeries® Hex Manifold for large volume injections
