

SOIL MOISTURE MANAGEMENT

Hydretain Pro® Granular

Root Zone Moisture Management

Designed for PHC professionals, Hydretain Pro builds on Hydretain® technology to optimize water use while improving overall soil health for vibrant turf and landscapes.

Hydretain Pro Granular includes humic acid, seaweed extracts and organic worm castings to increase microbial activity and enhance root growth. Hydretain Pro Granular ensures steady hydration by moving moisture through the soil and condensing vapor into water droplets so nutrients are more effectively absorbed and retained.

Hydretain Pro supports significant cost efficiencies beyond overall savings for watering. With most applications lasting up to 12 weeks, using Hydretain Pro requires fewer site visits and smaller crews to maintain high-quality turf.

Even in challenging conditions, Hydretain Pro's advanced formula makes the most out of every drop of water, ensuring the vigor, vitality, and lasting beauty of your landscapes.

APPLICATIONS

Lawns

Greenhouses

Sports Fields

Trees & Shrubs

Golf Courses

Field-Grown Crops

Parks

Flower Pots & Beds

SIZES

3 lbs. - 080-8300

15 lbs. - 080-8310

40 lbs. - 080-8320

2,000 lbs. - 080-8330
