

SOIL MOISTURE MANAGEMENT

Hydretain Pro®

Root Zone Moisture Management

Designed for PHC professionals, Hydretain Pro builds on Hydretain® technology to optimize water use while improving overall soil health for vibrant turf and landscapes.

Hydretain Pro features humic acid and seaweed extracts to increase microbial activity and enhance root growth. Hydretain Pro ensures steady hydration by moving moisture through the soil and condensing vapor into water droplets so nutrients are more effectively absorbed and retained.

Hydretain Pro supports significant cost efficiencies beyond overall savings for watering. With most applications lasting up to 12 weeks, using Hydretain Pro requires fewer site visits and smaller crews to maintain high-quality turf.

Even in challenging conditions, Hydretain Pro's advanced formula makes the most out of every drop of water, ensuring the vigor, vitality, and lasting beauty of your landscapes.

APPLICATIONS

Lawns

Sports Fields

Golf Courses

Parks

Greenhouses

Trees & Shrubs

Field-Grown Crops

Flower Pots & Beds

SIZES

1 qt - 080-8200

1 gal - 080-8210

2.5 gal - 080-8220

30 gal - 080-8230

55 gal - 080-8240

275 gal - 080-8250
