

ORGANIC INSECT &
DISEASE CONTROL

Eco-1[®] Aza

Botanical Insecticide

Eco-1[®] Aza is a plant-based insecticide for professional growers and landscapers. This broad-spectrum insect growth regulator is compatible with existing integrated pest management programs.

Eco-1 Aza contains a 6% concentration of azadirachtin, allowing users to treat more plants with less product. The formulation is effective against insects regardless of where they are located on the plant from leaves to soil.

Eco-1 Aza's oil-free formulation mixes easily and leaves minimal residue on plants and equipment, helping professionals move efficiently from one application to the next. Additionally, Eco-1 Aza can be used on food crops at any time, helping minimize downtime between treatments. Easy to apply both indoors and outdoors, Eco-1 Aza is a versatile solution to eliminate damaging pests without harming plants or interrupting harvests.

EFFECTIVE AGAINST

Aphids

Whiteflies

Mites

Caterpillars & Moths

Thrips

Flies & Fungus Gnats

Soft-Scale Insects

Beetles & Grubs

SIZES

1 pint - 040-5102

1 quart - 040-5103

ECO-1[®]aza

PRODUCT BENEFITS

APPLICATION INSTRUCTIONS

Apply via foliar spray, soil drench, soil injection, bark spray, chemigation, or hydroponics. Can be used indoors or outdoors.

DERIVED FROM NEEM
Contains 6% azadirachtin

SYSTEMIC & TRANSLAMINAR
Targets insects wherever they live on the plant

GREAT FOR USE ON THESE

INSECT GROWTH REGULATOR
Hinders the ability to feed, grow, or reproduce

LESS DISRUPTION
No pre-harvest interval, short re-entry intervals

OIL-FREE FORMULA
Less residue lowers burn risk, won't clog equipment

HIGH COMPATIBILITY
Incorporates easily into existing botanical IPM programs
